INDIA ON A PROGRESSIVE PATH

Building Opportunities for Construction Industry

India has to enhance its infrastructure to reach its 2025 economic growth target of US\$ 5 trillion.

The construction Industry in India is expected to reach \$1.4 Tn by 2025.

100% FDI in the construction industry in India under automatic route is permitted in completed projects for operations and management of townships, malls/shopping complexes, and business constructions.

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world-class infrastructure in the country. Infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development.

The country has an ambitious agenda for development and aims to invest in sustainable infrastructure development, setting out a strong roadmap for the industry and perhaps also building confidence among the global players on India being an investment destination for group infrastructure and equipment. Various national level schemes and policies have been implemented to build core infrastructure and maintain economic growth. The National Infrastructure Master Plan – Gati Shakti, the National Infrastructure Pipeline (NIP), and the National Monetisation Pipeline have been momentous in attracting investments for infrastructure, increasing industrial growth and opening new development opportunities.

Exhibit Profile

- Aggregate Equipment
- Asphalt Equipment
- Attachments / Compactors
- Components / Accessories
- Compressors / Generators
- Concrete Making Equipment, Construction Equipment & Construction Work
- Drill, Power Tools
- Earth Moving Equipments
- Electronics / Controls / Instrumentation
- Engines & Power Trains
- Hydraulics and Pneumatics
- Information Technology, AI & IOT
- Material Handling Equipment
- Piling equipment, Publications, Pumps, Rollers, Service Leasing & Financing
- Spare Parts, Oil, Lubricants, Consumables etc

Visitor Profile

- Contractors
- Government Officials
- Public sector companies
- Leasing & Finance Companies
- Machinery & Equipment Dealers
- Construction Companies
- Equipment Rental Companies
- Project Developers
- Urban Infrastructure Developers
- International Visitors
- Investors in Construction
- Buyers of Construction Equipments & Technologies, Sourcing of Components & Aggregates (Using India as a Equipments & Components Sourcing Base)

'Construction Equipment Sales may Grow 15-20% This Fiscal'

Govt spending on infra would help boost demand, says JCB India MD

Sharmistha.M@timesgroup.com

New Delhi: Sales of construction equipment—a barometer of economic activity—are expected to increase in healthy double-digits in the ongoing financial year on the back of increased government spending on infrastructure projects, especially in rural areas. The industry estimates sales of construction equipment (domestic sales and exports) to grow 15-20% in FY22, compared with an 8% fall last fiscal year. Even though exports grew 60% in 7,800 units in FY22, local sales fell 11.4% to 7,260 units. "Last fiscal, the industry output declined by about 6% due to a fall in demand for road construction and earthmoving equipment," said Deepak Shetty, managing director at market leader JCB India, while adding that the government's focus on infrastructure investment to increase economic activity would, in turn, also help boost demand for them. But a step rise in input costs and constraints in the supply chain are concerns, he said. The central government has

People at bottom of pyramid real movers of economy: Bommai

SPECIAL CORRESPONDENT BENGALURU

The inclusion of people at the bottom of the pyramid is critical since they are the real movers of the economy, said Basavaraj Bommai, Chief Minister, Karnataka.

Inaugurating EXCON, South Asia's largest construction equipment (CE) trade fair organised by the Confederation of Indian Industry (CII) here on Tuesday, the CM said, "Though our major focus should be growing exponentially in the country by advancing our technologies, the inclusion of people at the bottom of the pyramid is also critical since they are the movers of the economy."

He urged global captains of the CE sector gathered at

the event to collaborate with communities at the bottom of the pyramid to further the

growth of the CE sector in particular and economy in general. The CE sector was

expected to contribute greatly towards the country reaching its ambitious target of \$5 trillion economy by 2025, the CM said. "The infrastructure sector is receiving an intense push from the government, propelling India's overall development and GDP. The policies announced by the Union government will ensure a time-bound creation of world-class infrastructure in the country."

Business opportunities Mr. Bommai said his State offered huge business opportunities for the construction industry, as it was embarking on major infrastructure development projects in roads, flyover, industrial infrastruc-

ture and power, even as the Union government has committed ₹100 lakh crore for major infrastructure and industrial projects in the next five years.

Speaking at EXCON, V.K. Singh, Union Minister of State for Road Transport & Highways, said, India was an emerging hub for construction equipment, component outsourcing base and design base.

"The private players in the construction industry must concentrate on automation, adoption of advanced technologies and global best practices, usage of alternate fuels, and innovations in using waste materials as raw materials for their construction projects to diminish the

cost of construction and rate of pollution," he added.

According to Mr. Singh, infrastructure must be sustainable and the industry should take measures to enhance the quality at an affordable life cycle cost. "We are working hard on hydrogen fuel technology and solar energy since we consider it as the future of the country. The CE industry must be prepared for the competitive market situation and focus on Industry 4.0 for revamping itself," he urged.

Over 800 exhibitors from India, Belgium, Czech Republic, France, Germany, Italy, South Korea, Spain, Sri Lanka, UAE, UK and US are participating in the five-day EXCON.

Construction sector must adopt advanced tech: Singh

TIMES NEWS NETWORK

Bengaluru: General (retd) V K Singh, Union minister of state for road transport & highways, urged private players in the construction industry to concentrate on automation, adoption of advanced technologies and global best practices, usage of alternate fuels, and innovations in using waste

Confederation of Indian Industry (CII) in Bengaluru. India, he said, is an emerging hub for construction equipment, component outsourcing and design.

He said India is working hard on hydrogen fuel technology and solar energy sin-

structure requirements for armed forces, Lt Gen Rajeev Chaudhry, director general of the Border Roads Organisation, said, "We aim to embrace the latest technology to meet any challenges that might threaten the country's security."

Lt Gen Harpal Singh, ADC engineer-in-chief in the Indian Armed Forces, said, "India's defence sector

'INFRASTRUCTURE KEY TO BOOST INDIAN ECONOMY'

INDIA TO INVEST OVER INR 100 LAKH CRORE IN NEXT FIVE YEARS

SPECIAL CORRESPONDENT NEW DELHI:—Bengaluru: Construction sector will witness a major impetus to Indian infrastructure vision to realise India's USD 5 trillion economy, said Chief Minister, Government of Karnataka, "Shri. Basavaraj Bommai" on Tuesday.

He while addressing his inaugurated address at the 17th edition of CII EXCON, South Asia's largest construction equipment trade fair organised by the Confederation of Indian Industry (CII).

He urged that, "The infrastructure sector is receiving an intense push from the Government, propelling India's overall development and GDP. The policies announced by the Union government will ensure a time-bound creation of world-class infrastructure in the country, making India's economy globally competitive."

He added that, "The government's focus on infrastructure investment to increase economic activity would, in turn, also help boost demand for them. But a step rise in input costs and constraints in the supply chain are concerns, he said. The central government has

India, world's third military spender seeks CE technologies, machinery support

BENGALURU: India is the world's third largest military spender and is seeking cooperation from the Construction Equipment (CE) by incorporating technology and offers the most up-to-date building technologies and machinery to build a strong infrastructure efficiently with minimal environmental impact," said Excon-2022, South East Asia's largest construction equipment technology trade fair.

"To establish a united defense base, we need to concentrate on digitized construction and security solutions."

The second day of CII EXCON focused on the technological aptitude in the defense sector. Leader and EXCON, India on Defense and Paramilitary Ravi Chandra, mentioned that the infrastructure sector needs to be included in the spectrum of the armed forces.

President, Indian Construction Equipment Manufacturers Association Anand Sundaresan said, "In order to promote sustainable dependency on imports, India has a long way to go. The private players should design and build military systems in conjunction with DRDO and other organizations to create a robust ecosystem for our military force."

will be the first of its kind in the CEV tuning and off highway segment.

Ashok Leyland Executive Chairman (Defense) Hrishabh said, "We aspire to continue to do so by expanding our portfolio of CNG Engines and technology solutions. Ashok Leyland aims to make India's CNG engine sector self-reliant, and to be one of the leaders in the 'Make in India' narrative."

Ashok Leyland CEO D N Srinivasan said, "With the increasing need for better fuel efficiency and use of alternate fuels, we have a solid pipeline of such technologies. We aspire to lead the market in this segment, as the need for engines with alternative fuels grows."

Ashok Leyland VP Defence and P&B Rajesh R added, "These innovative engines are the latest in line and can be used across various applications for the growing needs of the construction equipment industry."

In addition, Tata Motors has showcased a range of its high-performance commercial trucks at EXCON.

A total of over 1,000 exhibitors from India and abroad, including from countries like USA, UK, France, Germany, Italy, UAE, South Korea, Singapore, and Sri Lanka at EXCON.

Confederation of Indian Industry

The Confederation of Indian Industry (CII) works to create and sustain an environment conducive to the development of India, partnering Industry, Government and civil society, through advisory and consultative processes.

For more than 125 years, CII has been engaged in shaping India's development journey and works proactively on transforming Indian Industry's engagement in national development. CII charts change by working closely with Government on policy issues, interfacing with thought leaders, and enhancing efficiency, competitiveness and business opportunities for industry through a range of specialized services and strategic global linkages. It also provides a platform for consensus-building and networking on key issues.

As India strategizes for the next 25 years to India@100, Indian industry must scale the competitiveness ladder to drive growth. It must also internalize the tenets of sustainability and climate action and accelerate its globalisation journey for leadership in a changing world. The role played by Indian industry will be central to the country's progress and success as a nation. CII, with the Theme for 2023-24 as 'Towards a Competitive and Sustainable India@100: Growth, Inclusiveness, Globalisation, Building Trust' has prioritized 6 action themes that will catalyze the journey of the country towards the vision of India@100.

With 65 offices, including 10 Centres of Excellence, in India, and 8 overseas offices in Australia, Egypt, Germany, Indonesia, Singapore, UAE, UK, and USA, as well as institutional partnerships with 350 counterpart organizations in 133 countries, CII serves as a reference point for Indian industry and the international business community.

Indian Construction Equipment Manufacturers' Association (ICEMA) is an apex association for Construction Equipment manufacturers in India. ICEMA represents over 80+ leading companies that manufacture, trade and finance a wide range of Construction, Earthmoving, Mining and Material handling equipment used in the critical activities of developing a robust world-class infrastructure for the Nation. Over 95% of OEMs from CE industry in India, are members of ICEMA. Apart from this, the other leading companies who manufacture, trade and finance a variety of products such as hydraulic excavators, wheel loaders, backhoe loaders, motor graders, vibratory compactors, cranes, dumpers, tippers, forklifts trucks, dozers, pavers, batching plants, diesel engines, etc, have been associated with ICEMA as members.

The membership of ICEMA boasts of some of the leading names from different sections of economy including, Banks; NBFCs, Equipment Financing & Insurance companies; Oil companies; Lubricant manufacturers; Tyre manufacturers; Aggregate Manufacturers of Engine/Hydraulic Component/Under carriage, affiliate associations, and dealers and suppliers of OEMs, among others. A non-government & not-for-profit organization, ICEMA serves as a reference point for India's CE industry and is actively engaged with Government on policy matters to articulate the views and concerns of CE industry in India.
